Appropriation: Helium Fund and Operations

ACTIVITY SUMMARY

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996, Public Law 104-273, discontinued production and sale of refined helium. Proposed regulations are being drafted to facilitate administration and implementation of other provisions granted under 50 U.S.C. 167.

Beginning with 2006, the Helium Budget Request program change recognizes \$80,000,000 carry forward balance. This is a change from the presentation in 2005 Budget Request.

2006 PROGRAM OVERVIEW

In 2006, the Helium program supports the Resource Use mission goal from the Department's Strategic Plan by providing the helium requirements of essential Federal government programs. The BLM New Mexico Field Office located in Amarillo, Texas will accomplish this objective through crude helium transmission and storage of Federal and private crude helium via the helium storage system; the administration of the sale of crude helium (coordinated with the private helium industry so as not to disrupt the helium market); the evaluation of helium resources; and the administration of helium extracted from Federal lands. The helium storage system ensures that excess helium produced from natural gas processing plants connected to the pipeline network is conserved for future use. Federally owned natural gas containing marketable helium reserves will be identified and contracted for sale or royalty to enhance conservation of crude helium already in storage.

The *Helium Privatization Act of 1996*, P.L. 104-273, significantly changed the objectives and functions of this program. This legislation established revised guidelines for the helium program. Specifically, it directed BLM to:

- Continue the storage and transmission of crude helium.
- Sell the crude helium reserve over an extended period.
- Oversee production of helium on Federal lands.
- Conduct a National Academy of Sciences study on helium issues.

As of October 2001, the legislation has resulted in the reduction of personnel from 173 (in 1997) to 49, cessation of refining functions, and initiation of orderly disposal of the excess property. Remaining environmental cleanup costs will add to the funds typically required in a normal year. These costs are expected to be variable, depending on the results of environmental assessments of the decommissioned production facilities. Divestiture of the Amarillo and Exell

Section XIII - Helium Fund Page XIII - 3

plant sites will be influenced, in part, on the results of the Environmental Site Assessments. Based on findings from Phase One Environmental Site Assessments, no significant environmental cost increases are expected.

In 2006, the program will continue to meet the needs of Federal customers through "in-kind" crude helium sales to Federal helium suppliers and open market sales in accordance with the *Helium Privatization Act of 1996. All t*he income derived from crude helium sales, from private helium storage, and from fee sales/royalty payments for helium extracted from Federal lands will pay the full costs of the program.

In 2006, the Helium program will:

- Continue storage and transmission of crude helium.
- Administer helium fee and royalty contracts for helium extracted from gas produced on Federal lands.
- Administer the in-kind and open market crude helium gas sale programs.
- Conduct helium resource evaluation and reserve tracking to determine the extent of helium Resources.
- Complete the disposal of helium refining-related facilities not needed for the storage and transmission of crude helium.

JUSTIFICATION OF 2006 PROGRAM CHANGES

2006 PROGRAM CHANGES 2006 Program Budget Changes Request (+/-) Helium Fund 157.000 +82.000 (\$000)Offsetting Collections -157,000 -82,000 (\$000)0 FTE 54

The 2006 budget request for the Helium Fund and Operations is \$157,000,000 and 54 FTE, a program change of +\$82,000,000 from the 2005 requested level. This change is offset by \$82,000,000 in additional collections.

Helium Enrichment (+\$2,000,000) - In 2003 and 2004, in conjunction with private industry, there was a new helium enrichment unit added to the facilities at the Cliffside Gas Field. This addition will ensure that helium offered for sale in accordance with the Act can be provided in the most efficient and timely way possible.

Carry Forward Balance (+\$80,000,000) – Beginning with 2006, the Helium Budget Request recognizes \$80,000,000 carry forward balance. This is a change from the presentation in 2005.
